Language

- Urdu (Native)
- English (Fluent)

Education

COMSATS University Islamabad
Bachelor in Software Engineering
2020 - 2024

Skills Summary

Experience

ELIXIR Technologies Islamabad - Pakistan 2024 - present

Led the revamp of XML file viewer's UI and back-end, and improved Lexical (Text editor) performance. Took ownership of key features, optimised front-end and back-end components, and ensured code quality through testing and reviews. Collaborated across teams to deliver scalable and maintainable software solutions.

Technologies Used: TypeScript, React, JAVA (vanilla 8), Lexical, MUI.

Projects

Final Year Project (VTuner)

A web project that provides a content creation platform for VTubers, where model appears instead of the person in camera and motion capture is applied through TensorFlow.

Technologies Used: TypeScript, React, Express, Mongo, TensorFlow, Python, GLTFLoader.

Lexical Editor [\(Live link in portfolio\)](#)

Features real-time collaboration via Yjs, custom nodes (links, images, tables), floating menus, a responsive toolbar with overflow handling, and serialization support.

Technologies Used: TypeScript, React, Lexical, Yjs, prismjs.

Three.js Data Globe [\(Live link in portfolio\)](#)

An interactive 3D globe visualization with real country borders from GeoJSON, data-driven population spikes, raycasting tooltips, and play/pause controls. Built with a clean useThreeScene hook architecture.

Technologies Used: TypeScript, React, Threejs.

Design Library [\(Repo link in portfolio\)](#)

A reusable React component library with a full theming system (light/dark), semantic color tokens, and components like Button, Checkbox, Select, and Slider. Published on npm and used across multiple projects.

Technologies Used: TypeScript, React, npm, rollup
